## TARPON FISHING IS BACK...

May 8-9, 2009

Water temperature is up and tarpon are now moving into the Pass. By the third week of April we should be at the beginning of our best fishing, which should go through July. As of right now, catching a tarpon during the best time of day and then moving on to other species such as mackerel, grouper, snook or redfish has been a very productive plan. Now is the time to get with your favorite local guide if you have one or you can contact Knight Brother's Charter's (a fourth generation local guide company) at 941-964-2484.
